

PREGNANCY SCARE

Written by

MATTHEW COWAN

INT. LIVING ROOM - DAY

A GIRL sits nervously on a couch, standing over her is an equally nervous BOY, they look at each other before turning over a positive pregnancy test. They SIGH.

BOY

So what are we gonna go then?

GIRL

Well we're going to have to take responsibility for our actions,

BOY

How?

GIRL

First things first, we'll need to do some research. What pregnant woman can and can't do, that sort of thing.

Girl takes out a laptop, goes online and starts reading from her screen.

BOY

Alright so, what does it say.

GIRL

Umm, right... it says that a pregnant woman should never under any circumstance: drink alcohol, smoke cigarettes, or do any kind of drug.

BOY

Yeah, we already knew that, what are some of the weirder ones?

GIRL

Ok, ok, no rollercoasters.

BOY

Easy enough.

GIRL

Don't drink coffee.

BOY

Alright not too bad.

GIRL

And... oh fuck.

BOY
What is it?

GIRL
It says here no eating sushi.

BOY
Aww baby I'm so sorry, that'll be
such a hard one for you... you hate
sushi.

CUT TO:

I/E. VARIOUS - DAY

They are now going through various locations, drinking some
booze, drinking coffee, adding booze the coffee before
drinking that. Eating sushi while enjoying a rollercoaster.
They go to a boxing gym, the woman enters the ring with an
opponent, she guards her face the whole time, receiving only
body blows. They tie a piece of string to Girl's belly
buttons and a door, before slamming the door shut.

INT. LIVING ROOM - DAY

The same boy and girl are in a similar position as the
beginning, standing over a positive pregnancy test.

GIRL
Fuck, we've done everything, now
what?

BOY
Well, we could always try plan B.

GIRL
And what's that then?

Boy takes out the morning after pill.

GIRL (CONT'D)
Eyyyy.

BOY
Eyyyyyy

GIRL
Eyyyyyyyyyy.

BOY (CONT'D)
Eyyyyyyyyy.

CUT TO:

INT. HOSPITAL - DAY

The Boy and Girl, are sitting in a hospital, the Boy and Girl look like death, bags under their eyes and fried hair. The Girl holds a new born baby. Across from them is a Doctor.

DOCTOR

Cholera, ebola, dysentery, covid, and even cancer. This is just a small list of things that your child is immune to. There's no way to know but we think he's actually immune to every illness known to man. Not only that but presumably also has no allergies, well no sorry that's a lie, he does have one allergy, weakness? Anyhow, I don't know what you two did but you must care for this little guy a whole lot, he is without a doubt the healthiest baby I have ever seen.

THE END
